

Docker Desktop + n8n Installation Guide

Step 1: Install Docker Desktop

- Download Docker Desktop from the official website or Microsoft Store.
<https://www.docker.com/products/docker-desktop/>
- Install and launch Docker Desktop.
- Sign in with your Docker account.
- Wait 1–2 minutes for Docker Desktop to initialize (Docker Engine starts automatically).

Open Windows Powershell/ Terminal In administrator mode:

Run these Commands in the terminal

1. `docker --version`
2. `docker pull n8nio/n8n`
3. `docker run -d --name n8n -p 5678:5678 -v n8n_data:/home/node/.n8n n8nio/n8n`
4. `docker ps`

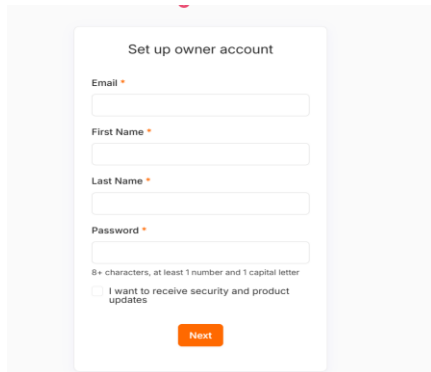

```
PS C:\Users\nesar> docker --version
Docker version 29.6.2, build dfc4efb
PS C:\Users\nesar> docker pull n8nio/n8n
Using default tag: latest
latest: Pulling from n8nio/n8n
9ddc8c3f633d: Pull complete
a2035c8e0f50: Pull complete

PS C:\Users\nesar> |
```

Open Web Browser,

Login into :

Open **http://localhost:5678** in your browser and complete the **n8n owner account setup** (create your admin email and password).

<http://localhost:5678>

The screenshot shows a web browser window displaying the 'Set up owner account' form. The form is titled 'Set up owner account' and contains the following fields: 'Email', 'First Name', 'Last Name', and 'Password'. Each field has a red asterisk indicating it is required. Below the 'Password' field, there is a note: '8+ characters, at least 1 number and 1 capital letter'. There is also a checkbox labeled 'I want to receive security and product updates'. At the bottom of the form is an orange 'Next' button.

Once signed in, you will get the workspace
